HEALTH, SAFETY, QUALITY...

STRETCH FILM

Stretch films provide hygienic and healthy protection environment to foods. They prevent contact of food with air and allow food to breath thanks to their micro pores.

Stretch films provide efficient use and results thanks to their developed extra transparency with crystal brightness, extra resistance to tearing and rupture, high wrapping, gripping and retaining quality, economical use, and anti-fog properties. We introduce products with various width, length and thickness and types suitable for automatic and manual use. We also produce and market products suitable for house and horeca use as well as industrial products.
